# Turn-Key Controls

Comprehensive Expertise  
in Industrial Automation

## About Us

Turn-Key Controls provides integrated automation solutions across every phase of the control system lifecycle—design, programming, panel construction, and field support—serving as a single trusted partner for reliable automation.

## Our Core Capabilities

### 1. Programming Services

- PLC (Programmable Logic Controller) programming
- HMI (Human Machine Interface) development

### 2. Engineering & Drafting Services

- Electrical control system design
- Detailed drafting and documentation
- UL and CSA-compliant panel design

### 3. Field Services & Remote Support

- System installation and commissioning
- Troubleshooting and optimization
- Ongoing remote diagnostics and support

## Supported Systems

- Industrial control panels
- Industrial motor control panels
- Low-voltage VFD (Variable Frequency Drive) panels
- Contactors and soft-start motor controls

## Quality & Reliability

Turn-Key Controls designs and builds all systems to **UL 508A** and **CSA standards**, with a focus on long-term performance and safety. Every panel undergoes in-house testing beyond basic compliance, including:

- Live PLC I/O verification
- Full analog, fieldbus, and VFD/soft-start testing

### Ask About our Hazardous Location Capabilities

- UL 698A
- NNNY (Explosion-Proof Panels)
- Class I, Division 2 certified systems
- NRBX (Intrinsic Safety Panels)

UL-approved to certify hazardous location panels; eliminating third-party delays and costs.

# Our Trusted Partners

Low-voltage drives are sourced directly through ABB, ensuring speed and cost efficiency.

Our long-standing partnership with nVent ensures reliable, competitively priced supply from Mexico and Canada—supporting enclosures, low-voltage drives, and air conditioners through its nVent HOFFMAN and nVent ERIFLEX solutions

In-house VMI supports reliable access to ducting, cable management components, and ground bars, with local stock of Ethernet cords for fast deployment.

RECOGNIZED SUPPORTER

OEM pricing and VMI support reliable access to PLCs, HMIs, I/O, power supplies, and circuit protection devices.

A 10+ year partnership with Rittal, supported by VMI and supply from Canada and Europe, ensures consistent access to electrical

Silver System Integrator with product expertise and warranty support across Rockwell PLCs, HMIs, drives, motors, safety I/O, and control hardware.

## SIEMENS

A Siemens Solutions Partner for over 25 years, with direct Siemens Mall access for efficient sourcing of PLCs, HMIs, low-voltage drives,

In-house stock of Weidmüller terminals, relays, printers, power supplies, Ethernet components, and circuit breakers supports efficient, consistent panel assembly.

Looking for something specific? We work with a broad network of trusted suppliers. Just ask, and we'll match you with the right solution.

## Our Locations

### Vernon Office

2806 45 Avenue  
Vernon, B.C. V1T 3N4
